AnyMeeting Navigation

The screenshot displays the AnyMeeting interface with a dark top navigation bar. The bar includes icons for Meeting Options, Invite, Record, Cam, Mic (highlighted with a red circle), Share, My Mood, End Meeting, and Help. Below the navigation bar, a red-bordered box highlights the 'My Mood' section, which contains four buttons: 'I'm Fine' (grey), 'Raise Hand' (blue), 'Yes' (green), and 'No' (red). The main meeting area features a background image of a green field under a blue sky with clouds. A white slide titled 'Test 1' is centered on the screen, indicating it is hosted by Rochelle Grayson on Sunday, December 09, 2012 at 12:05 PM (Pacific Time), with a link to 'Audio Options'. On the left side, the 'Attendees' panel shows 1 Online, 0 on Phone, and 1 Unmuted participant, Rochelle Grayson. The 'Chat' panel at the bottom left has a red arrow pointing to a dropdown menu set to 'Send to Everyone' and a text input field labeled 'Type your message here'.

Website Header

The "Website Header" is the top part of each web page that is common for all pages. It contains a "Title" and "Tag Line".

Website Title:

Jane Example

A title for your website. The title is used in various places on your website including at the top of each page.

Tag Line:

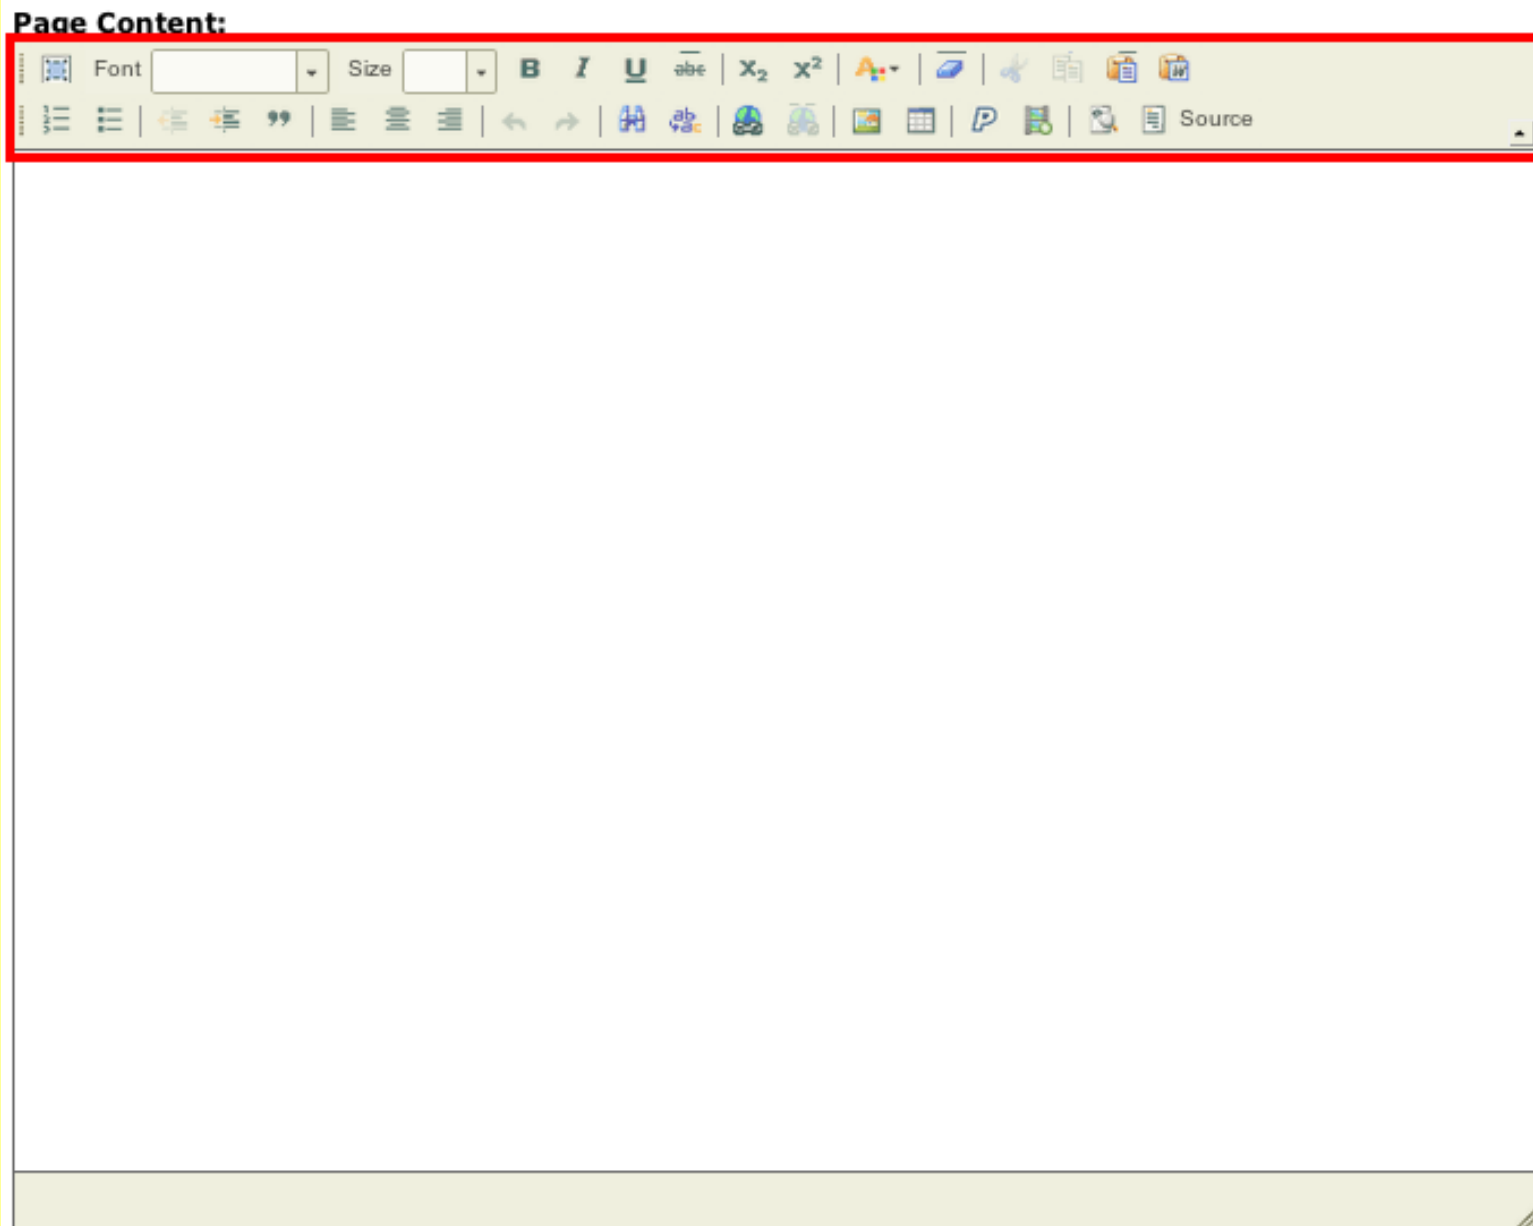

[Tag line, e.g., Watercolours. Change in administration system.]

The tag line is a short phrase that represents your website in a few words. Take some time to think about this as it is important in ranking at search engines.

ArtSites Content Editor

The above window provides word processor like editing capability for the content of a web page. This does differ in some ways from word processors. To insert images you need to first upload the image as a part of the image system. **Unsupported web browsers (i.e., Internet Explorer before version 6.0, Firefox before vesion 3.0, Safari before version 3.0, Opera before version 9.5) will only show a normal edit box with no icons at the top and will have reduced functionality. Make sure that you don't have a popup blocker that will prevent some dialogs from operating.**
